EDUCATION

Purdue University

Bachelor of Science in Computer Science

- **Relevant Coursework:** Data Structures & Algorithms, Computer Architecture, Linear Algebra, Multivariate Calculus, Discrete Math, Intro Artificial Intelligence, Systems Programming

West Lafayette, IN

May 2027

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, C, C#, JavaScript, TypeScript, SQL, HTML, Bash

Frameworks & Libraries: FastAPI, Flask, Spring Boot, React, Next.js, Node.js, PyTorch, Hugging Face, NumPy, Pandas, Matplotlib, Mediapipe, CUDA, JUnit, pytest

Tools & Platforms: Git, Docker, AWS (EC2), GCP, Linux/Unix, PostgreSQL, SQLite, RunPod

EXPERIENCE

Incoming Software Engineering Intern

JPMorgan Chase & Co.

June 2026 – August 2026

Undergraduate Researcher – Multimodal Generative AI

Purdue University

- Build PyTorch pipelines for Text-to-Duet and Dance Accompaniment, improving models by 60–500%.
- Analyze VR/XR and multimodal embeddings, identifying 5 use cases and contributing to a research paper.
- Spearheaded research on a 10K+ annotation Duet Dance dataset, driving up to 6x accuracy gains in generation.

September 2025 – Present

West Lafayette, IN

PROJECTS

Reachy Mini | *Hugging Face, PyTorch, WebRTC, RunPod, Python*

- Architected a robotic assistant using a Raspberry Pi 5 and GPU servers, integrating Hugging Face Transformers to improve multimodal emotion and intent recognition accuracy by 40%.
- Engineered WebRTC streaming and optimized C++ drivers to reduce I/O delays by 25%, maintaining sub-100ms response times for adaptive, context-aware dialogue.

AirCursor | *Google Mediapipe, OpenCV, NumPy, Google Colab*

- Built a CNN on 1,440 video frames, reaching 95% accuracy in hand-gesture recognition.
- Accelerated data processing, cutting training time to 5 minutes and enabling rapid gesture creation.
- Implemented a low-latency cursor control system with PyAutoGUI and OpenCV, enhancing real-time interaction.

Shop22 | *TypeScript, Stripe API, Payload CMS, Next 14, Docker*

- Developed an e-commerce platform with React and Payload CMS, enhancing shopping with customized product listings.
- Implemented secure payment processing with Stripe API, optimizing transaction flows and trust.
- Configured Docker for seamless deployment, ensuring a scalable and maintainable architecture.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Career Prep Fellow

Management Leadership for Tomorrow

- Accepted into a selective 18-month professional development program that accelerates the career growth of emerging leaders through structured coaching, mentorship, and targeted skill-building.
- Develop business and technical acumen through hands-on technical assessments, case studies, simulations, and project work designed to strengthen analytical, strategic, and leadership capabilities.
- Engage with partner organizations (e.g., LinkedIn, Bloomberg, Deloitte) to gain industry exposure and insight into tech-talent pathways.

January 2026 – Present

Backend Developer – Code for Good Hackathon

JPMorgan Chase & Co.

- Developed 10+ Flask RESTful endpoints using SQLAlchemy ORM, implementing robust CRUD operations, error handling, and CORS configuration for frontend integration.
- Built automated CSV ingestion pipeline transforming raw data into structured database records, enabling real-time dashboard updates through backend-frontend API integration.
- Authored 56 commits (47% of repository), leading backend architecture and deploying to AWS EC2 to achieve top-3 placement in 24 hours.

November 2025

Columbus, OH

Participant (Top 10% Selected)

Capital One First Gen Focus

- Chosen from 1,000+ applicants for an 8-week program focused on empowering first-generation students.
- Executed 10+ hours of coding workshops on LeetCode prep and software engineering career navigation.
- Advanced backend and ML skills through Capital One SWE mentorship, building 3 projects including a multilayer perceptron that improved name-generation accuracy by 25% and diversity by 40%.

May 2025 – July 2025

Chicago, IL (Virtual)
